PIONEER

In the mid-17th century, many European armies were generally equipped with flint guns, which lasted for over 200 years until 1848. The invention of the recoil gun was a significant revolution in firearms in the 19th century, ending the 500 year history of rifles being filled with bullets from the muzzle using a probe. It is known in some historical books as "opening up a new era of light weapons and infantry tactics"
